EAGLE INSIGHT

- Powerful analytic solution that enables to create quick business cases to prioritize the processes for automation.
- Independent advanced analytics solution.
- Cost-Effective solution, to help you scale up your automation program to the next level.

What is Eagle Insight?

➢ Eagle Insight is a cloud based advanced RPA analytics program. Eagle Insight tracks, measures, analyses and supports the performance of your entire automation program.

➢ Eagle Insight brings Process Insight, Business Insight, Support Insight and BOT Insight all on a single platform.

Quantify your automation benefits in real time:

- Eagle Insight connects people in your business with software robots i.e., bots by bringing operational analytics, business intelligence and support metrics on a single platform.

What you get?

1. Create Quick Business Case
2. Process Prioritization
3. Department wise Business Insight
4. Per Process Business Analytics
5. Agile KANBAN Board
6. Real-Time Bot Performance Metrics
7. Ticket Management & Support Insight
8. Team & Role Management

How it works?

- Eagle INSIGHT integrates with your automation tool (Blue Prism/UiPath etc.), extracts relevant data and transforms it into an intelligible visual format that empowers you to take value added decisions to optimize the performance of your automation program. ETL (Extract, Transform, Load) based data processing makes your automation analytics easy as pie.
